

**What is HOC? We have some data provided via the url:**

`https://raw.githubusercontent.com/iso1983/High-Order-Component/main/hoc/users.json`

**Create a component called Users and show the user data such as name, email in the Users component by applying a HOC on the Users component.**

**Answer: In simple terms a HOC is a component that upgrades another component. What do I mean by upgrade? It means it appends additional properties to it, usually data from API.**
